BARBARA ANN SCOTT

SONIA HENIE

—FIGHTING, ATTEMPTING AND AVOIDING—Picture-shaking star Sonia Henie was reported to be making an air war but enough to suit the role—with Olivea Barbara Ann Scott, 1944 Olympic champion, as her partner. The blonde from Norway was described as joined out of place for a gradual retirement by men from Chicago that Arthur M. White, producer, had engaged Ann Scott to replace her in the next Hollywood film series. Twenty-three-year-old Barbara Ann, whose bride now is in midtown Toronto, is expected to fly from England soon to start rehearsal. Appearances will include those at Madison Square Garden, New York, Chicago Stadium, W. London and Detroit.

DARING YOUNG GIRL—The daring young man on the flying trapeze of midday fame was a stage companion with Margie Ross of Aerobics, Calif., who climbed her pretty neck at a spine-chilling height far over the New York skyline, suspended from a fast-flying helicopter. The trapeze artist executed the stunt to dramatize U.S. clothing drive for civilian victims of the Korean war.

FIRST U.S. JET PLANES ARRIVE IN ENGLAND—Leaving well-defined vapor trails against the cloudy sky a U.S. squadron of 25 F-86 Sabre jet fighters is shown arriving over the Shepherd's Grove aerodrome. Its new base in England. These are the first U.S. Sabres to be based in Europe and will be the first unit of a foreign air force to form an integral part of Britain's air defence organization. The flight began at Spokane, Wash., made stops at Goose Bay, Labrador, Greenland and Iceland. At right, Colonel Robert J. Garrison, group commanding officer, is leaving out of his Sabre jet on arrival at the new base.—Central Press Canadian.

—Central Press Canadian.

BUSTLERS, VIGILANTES IN GUN FIGHT—Pioneers had nothing on the present-day residents of Uxbridge, Ont., when outlaws invaded the farm of the Manley family armed with shotguns and rifles. The rustlers were met by armed vigilantes and police but escaped after a running gun fight. Mrs. Jack Manley and her children are shown with the gun with which Mr. Manley believes he wounded one of the rustlers.

TO STRENGTHEN U.S. AIR DEFENCE IN FAR EAST—Powerful addition to U.S. Far East air forces are these F-46 Thunderbolts seen on board U.S. navy escort carrier en route to Japan. Planes came complete with pilots and mechanical personnel.—Central Press Canadian.

RAISING CHICKS IN FILING CARNERS—Chilton King of Eastern Canada, Fred W. Bray of Hamilton, Ont., has his chicks in corrugated paper filing cabinets for benefit of spectators at the Canadian National Exhibition, Toronto. He raises 4,000,000 chicks a year, sends them to Europe and the U.S. as well as all over Canada.—Central Press Canadian.

—Central Press Canadian.

ROCKET PLANE SETS NEW RECORD—Veteran test pilot Bill Bridgman (left), can now boast of having flown higher than man has ever done before, according to an official announcement of the U.S. Navy Bureau of Aeronautics. Flying the D-558-2 U.S. navy rocket plane, (above), he soared into the skies above Mono on Dry Lake, Calif., reaching an altitude of 78,000 feet (nearly 15 miles) and travelling at 3,300 miles an hour. It is powered by four rockets.

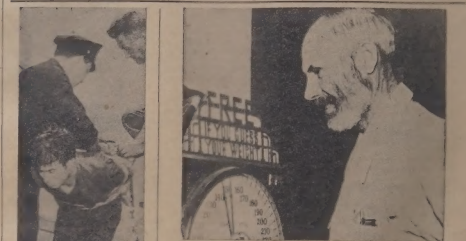

ROSSIE PAYS EXTRA DIVIDEND—Dividends in greater milk production are reported from farmers who have adopted "feeding pens" and "milking parlors" for their herds. Bruce Dawson is shown inside the Agincourt, Ont., which has 22 head of cattle. In the feeding pen system, the cows never leave the barn, are fed high-protein slugs all the year round.—Central Press Canadian.

CHAIN OF DISASTERS HIT MEXICO—Supporting common superstition that misfortunes come in threes in this scene near Carlsbad, Mexico. Train was caught and partly buried in a landslide during the hurricane that cut a swath of death and destruction through Mexico recently. The landslide was caused by the bursting of an irrigation dam under pressure of flood water built up by the torrential rain. It was estimated that 30 persons died in this area alone. Floods throughout the stricken area is put at close to 100.—Central Press Canadian.

TAKING SUNBATH—Three Canadian petty officers take a sunbath on the flight deck of the aircraft carrier Magdalen, barred from entering the harbor at Valparaiso, Chile, because of an outbreak of polio among her crew. The ship, which is participating in Montevideo naval exercises, has been required to anchor in the bay. In the group are, left to right, Chief Petty Officer Milton Perry, Ottawa, Petty Officer Albert Lewis, Dartmouth, N.S., and Petty Officer William Wales, Vancouver. In the background is the town of Valparaiso with its historic waterfront built by the Knights of St. John.

—THOSE THINGS ARE WROUGHT BY FRAYER—Two U.S. fishermen who were marooned in the Northwest Territories wilderness of Manitoba for 20 days said that they found religion in the rugged northland. John Tacheberger, 36, one of the seafarers, is shown weighing himself upon his arrival in Milwaukee after being rescued by a U.S. air force B-17 which spotted them 128 miles from their original destination. Tacheberger lost only 10 pounds despite heavy and fish diet, but his companion, Dr. John Tache, 45, lost 25 pounds. The men told their rescuers that they prayed hard and often that they would be found and firmly believe that prayer helped them.—Central Press Canadian.

TELEVISION KITTENS—Whim Mc and Mrs. Lawrence Doyle breed a name in their television set when they were puzzled. The set's picture tube had been sent to the repair shop and the inside was empty. That's what they thought until investigation proved otherwise. The kittens were sent to the television set. Whim Mc and Mrs. Lawrence Doyle breed a name in their television set when they were puzzled. The set's picture tube had been sent to the repair shop and the inside was empty. That's what they thought until investigation proved otherwise. The kittens were sent to the television set.

BRITISH MINISTER INSPECTS R.C.A.F.—On his inspection visit to Canada the Hon. Lord Hore-Roxborough, British secretary of state for air, visited R.C.A.F. Station, Canada, and conducted an inspection tour of the facilities and equipment of the station as well as station personnel. Here Lord Hore-Roxborough is shown with the guard commander, Flight Lieutenant James Wilson of Victoria, B.C. The white flares were in the charge of the members of the guard of honor detail aircraft trainees.

Leg Drive Is A Must

The most common mistake in modern professional football is the lack of the leg drive in the three-point stance. Here's what coach Paul Brown has to say about the fundamental for coaches most important in a football player.

The first thing I look for in a prospect and the first thing I try to teach a new player is the leg drive. It is the secret of great blocking, great tackling and great blocking. The three main phases of the game. People often say, "You can't teach leg drive on winning. The more I tell them, the more they have more leg drive per man than they ever did."

These are words that every football player can take to heart, because Brown has never coached losing teams. In high school, interest in football was high.

How does Brown develop this important leg drive? Well, here is one of the drills he uses.

A 30 foot circle is drawn on the ground, and two players take positions in the center. They place their hands on each other's knees, or on the ground. At a signal, each man to drive with his legs towards the end of the circle. This contest lasts for two minutes, divided into four rounds. The winner of the 20 seconds, the players drive as hard as they can, at a whole, half, three-quarters, and a full effort. The winner is the one who is still standing, still applying pressure, and not trying to force another man to the ground. The winner is the one who is still standing, still applying pressure, and not trying to force another man to the ground.

During this drill, the knees should be well bent as the players drive, and the feet kept constantly apart. The hands should be used for pushing and pulling, but not for blocking. The other player, they should not try to force each other. All the work is done with the legs.

Coaches keep this drill as a competitive test. With proper technique, a 30-second drive can often drive a 300-pound man out of the circle. The drill can be done by any player during practice time, working with a teammate or a partner.

Strength And Skill

Dr. C. Curran, head of the physical education research department at the University of Delaware, has found through careful testing that a player's strength has a great deal to do with skill in any game. This means that the strongest athletes are the best in developing the game skill. Curran found that this led to a sports world where the strongest did not demand muscle power, but skill.

Kitchen Meditations

By JANE DALE

SEPTEMBER
September is a favorite month. Of all the twelve is liked the best. Her months are mellow, warm and true. In richest colors they are dressed. Her fruit hangs temptingly for all. Her flowers are gorgeous in bloom. Her broad fields hold abundant store. With a grain of truth and a grain of gold.

September is a gracious month. As summer's heat has passed away, the sun is mellow and the breeze is cool. Adds rest to every busy day. September is a favorite month. Her month is welcomed with delight. Then that summer says goodbye to the sun and the summer of rain.

Weekly Tip

PREVENT CORROSION
The metal legs of all skis should be protected from corrosion by treating the metal of the cover with melted paraffin. Apply the paraffin before the skis are used.

On The Side : E. V. Durling

Right And Be Healthy

How often do you find yourself making a mistake? Or are you one of those people who never change a cross word? According to the psychologists, the answer is yes. The psychologists claim that in quarrelling affairs an emotional release, therefore, is good. When a man is angry, he is not in a position to think clearly. When a man is angry, he is not in a position to think clearly. When a man is angry, he is not in a position to think clearly.

The Hunchback Buckle

Are you familiar with the story of the hunchback of Notre-Dame? I believe it is about the first hunchback I ever read. It goes like this: There was a man named Quasimodo. He was a hunchback. He was a hunchback. He was a hunchback.

Young-Looking Hunches

It's not so long ago that when an artist drew a picture of a mother for the first time, the mother's face was always a mystery. The mother's face was always a mystery. The mother's face was always a mystery. The mother's face was always a mystery.

Great Deceit

One great virtue that everybody has is not only defined me, but also the name of his yacht, but he made me to the yacht.

Lady Talents

Who was the first female athlete? I think it was "Shipshape" Kelly who organized this type of sport in Atlantic City, N.J., about twenty-five years ago. Kelly was the first female athlete. Kelly was the first female athlete. Kelly was the first female athlete.

Romance Recalled Of Princess Elizabeth And Prince Philip

Happy Marriage Has Set An Example For Hundreds Of Young Couples Just Starting Out

LONDON — A young woman of 25 soon will arrive in Canada for a coast-to-coast tour with her husband. It will be their first visit to the Dominion and their two little children will be left at home. Princess Elizabeth and her husband, the Duke of Edinburgh, feel like a young couple, that Prince Charles, at 21, is a little young for travelling. And Princess Ann, at only 18, is a baby.

But it's a safe bet that the two will keep close to each other with their children during the five-week tour. Princess Elizabeth will be seen at her first public appearance, that of her first public appearance, that of her first public appearance.

Elizabeth and her husband have set an example for hundreds of young couples just starting out. Elizabeth and her husband have set an example for hundreds of young couples just starting out.

Air Rescue Service Proves It's Worth Saves 750 U.S. Fighting Men

By ANDREW S. BOONE
(CPO Correspondent)

TOKYO. — The Douglas probably most concerned about the Korean war, just one man among countless who said, "If the U.S. Army can't win, it was just one more man on a casualty list that slowly reached war-torn Korea."

With other members of his crew, he had been flying a disabled bomber over the Straits of Korea. The plane had been damaged in the crash, and the crew had been rescued. The man had died, supported by his injured men, leaving his crew members on the ground.

Chances were Joe had died from impact with the water, from drowning or from exposure. It was a long wait, waiting time hunting for him.

That might have been one way of looking at it. But it is not the way of Air Rescue Service.

The men of ARS continue to search no long as there remains even a remote possibility that a survivor may be found.

The men were too high for the Japanese to land. The Japanese feared low over the water — a Boeing Flying Fortress in World War II, but converted now in a life-saving aircraft. From the belly of the plane fell not bombs, but an ARS helicopter.

Landed gently by parachute, the

helicopter landed within 10 feet of Joe, and he climbed aboard. Even then, the work of the plane was not done. Joe had not yet found his way to safety.

Typical of many types of the work of Air Rescue Service, in war and in peace. The very existence of ARS is a testament to the importance of the individual. It costs a lot of money to keep ARS in operation.

Units of Air Rescue Service are stationed around the globe. A United States Air Force helicopter is available to both the military and the civilian, and in other countries which request it.

Typical of the way ARS works, the flight of the 2nd Air Rescue Squadron, based at Anderson Air Force Base in Guam. This outfit is responsible for all search and rescue operations over approximately 100,000 miles of ocean stretching south from New Guinea to the Philippines.

Most of ARS' rescue work is done in a semi-circular sector, the center of a semi-circular sector, the center of a semi-circular sector, the center of a semi-circular sector.

Proposed man-made space station circling earth regularly like watch dog of the world.

"In our children's lifetime, perhaps, the first man-made space station will be built to look after the earth."

ROCKET STATION TO BE FUTURE WATCHDOG OF THE WORLD. The sketch above illustrates a problem the world's greatest scientists are working on—the construction of a man-made space station, an artificial planet, which will circle the earth endlessly. Scientists claim that first launch to build one will control the world, as it could serve as a global weather station, world-wide television relay, rocket fueling station and bring every spot on earth within immediate, major climatic change.

Grandmother Collects Driitwood As Hobby, And Makes It Pay

A 65-year-old grandmother who tramps the busy west coast of Vancouver Island in search of driftwood has stumbled upon a unique act that is fast becoming a Canadian export.

Her materials are sold shipped some of driftwood, sea shells and sand dollars, crab feet, fish bones, and other items. She has given a new lease on life to her hobby.

The result was on view this morning to hundreds of tourists who have found themselves in a dinky little room as strange as the sea.

More Cars And Trucks On Road In Canada

OTTAWA. — There are more cars and trucks on Canadian roads now than ever before—almost one to every five people in the country.

The latest figures from Statistics Canada show that registrations of motor vehicles in 1960 compared with the previous year reached a new peak of 2,600,268 compared with 2,500,268 in 1959.

The increase compares with a rise of 12.6 per cent in 1959. Last year's registrations of motor vehicles rose 12.6 per cent.

Registrations of passenger cars both new and renewals rose to 1,906,714 in 1960, up from 1,734,000 in 1959. Registrations of trucks increased 12.9 per cent, to 615,554 from 545,671.

The increase said that according to the figures in relation to the population, Canada has the second highest number of cars per person in the world.

TRY AND STOP ME! An elderly scholar, living from hand to mouth, decided to try his hand at robbery under the name of "TRY AND STOP ME!"

He was caught by the police and sentenced to prison. He was released after a short time and decided to stop her.

Calgary Couple Expert Shots

Man And Wife Have Collected Eight Or Nine Dozen Trophies

CALGARY. — Alvin and William Macnab are one of the shooting couples in the country. Since they met on a hill, 14 years ago and married, they have been killing over the country for one marksmanship.

The couple have collected eight or nine dozen trophies in all kinds of shooting matches.

This year Mrs. Macnab made a place on Canada's Down team—probably the highest honor any Canadian woman has ever won.

The accident didn't stop him from continuing as his wife's coach, however. He is still a good shot.

Mr. Macnab was also a crack shot, but he was killed by a bullet in the shooting accident.

Windsor Girl Receives Jack Miner Scholarship

Although the late Jack Miner, Canadian National, never went to school, but was a great athlete and he died a poor man in the terms of money, his family has won the world's attention.

Alma College, located at St. Thomas, Ontario, has founded a scholarship in his name to honor his memory.

CANADIAN NATIONAL

quarters that the very things the government has done have slowed down production.

But the government stubbornly refuses to do the thing which must be done to stop inflation—impose controls. From 1941 to 1945, with controls, the cost of living index rose exactly 3.6 points. In the past year, without controls, it has gone up more than 20 points.

Sooner or later the government will be compelled to take the only effective measure by which inflation can be checked. We are afraid that when it does, the workers and farmers may be injured to a "freeze" that will perpetuate the present misadjustment. A freeze at present prices and profits would allow incomes to catch up to the increased living costs which have piled up in the past year.

—*Canada's Weekly*

BALANCING THE LABOR BUDGET

Public attention in 1951 has centred largely on the inflated price level and higher tax aspects of the defence program, and their impact was both immediate and widespread. This preoccupation with the monetary features of preparedness has tended to obscure what may in the long run prove to be the most difficult problem raised by the shift to a defense footing—that of finding the necessary labor.

The broad aspects of the projected program for the next three years were outlined by the responsible Ministers during the past session of parliament. Canadians were reminded that it was being embarked upon by nations existing far removed from those states in 1939-40, when, following the long depression of the thirties, there was still considerable slack in the economy. As we enter the last half of the program's first year, the economy as a whole is operating close to capacity and any insignificant unemployment is currently confined to short lay-offs in industries which are either retreating or awaiting defense orders, or whose operations are curtailed by shortness of materials.

The program originally envisaged for 1951 was expected to require up to 10 per cent of gross national production by the end of the year, the services of up to 200,000 people. It is estimated to have absorbed 100,000 up to the present, but appears to be lagging to the extent of three to six months. It now seems likely that defence in 1951 will take a substantially smaller percentage of total production than was previously estimated and a labor force within the 150,000-175,000 range by the end of the year. The pressure will, therefore, be all the greater in 1952-53 if the time schedule is to be maintained.

There is general agreement on the necessity of carrying the program to completion. At the same time it is recognized as desirable that the disruption of the civilian economy and the inflationary pressure inherent in the transfer of a large part of pro-

duction from a general to a particular use be held to a minimum. Reduced to its essentials, the problem is the joint one of production, not only of material, but also of enough civilian goods to keep prices' increases within bounds.

—*Canadian Bank of Commerce Review*

Local and District

Lester Battle is a patient in the Colonel Belcher Hospital in Calgary.

Mrs. I. Brimmer of the Queen's Hotel, is spending a few days in Calgary with relatives.

John Olson returned last week from San Diego, Calif., where he had been visiting his daughter.

Mr. and Mrs. S. Sloan attended the wedding of Miss Geneva Battle in Calgary last week.

Joe Littlejohn returned to Delta after spending several days in the country.

Bill Diegel, of Calgary, is on vacation in the district, and is reported to be assisting George McKay in harvesting.

Mr. and Mrs. Jack Grever, of Vancouver, visited in Delta for several days, renewing old acquaintances.

Miss Geneva Battle was married in Calgary to Mr. Harvey Segawar, of Ponoka, on Friday last, September 21st.

The inclement weather of last week put an end to most harvesting operations, though some barley threshing was accomplished in the northeast corner of the district. Things began to appear better on Sunday, as it was drying up, but heavy skies Monday developed into about two inches of wet snow on Tuesday morning and harvesting will be delayed at least another week.

Checking Bacterial Ring Rot

Inspectors appointed by the Alberta Department of Agriculture, have started their annual ring rot survey in the potato growing areas around Edmonton, Calgary, Brooks and Lethbridge. W. Labey, Supervisor of Crop Protection, reports encouraging progress in control of the disease, and more continued co-operation of all potato growers.

Bacterial ring rot, a highly contagious disease of potatoes, is transmitted readily and reduces the potato yield significantly. All areas where ring rot has been found are declared pest areas. Growers in these areas are required to obtain permits from the Department and the fields are inspected in the fall for presence of the disease. If ring rot is found, the grower is required to haul his crop in such a way that spread of the disease is prevented.

The survey has helped greatly in preventing spread of bacterial ring rot and in improving Alberta potato yields, says Mr. Labey. When the inspectors arrive, give him your full co-operation. Refusal to control of bacterial ring rot demands that every grower of potatoes is taking the necessary precautions and following recommended practices.

Your Commerce Branch

Keystone of Main Street

The towns of Canada are friendly places. There's the drug store, the post office...

...and your bank, where you meet your friends and exchange a neighbourly word with the people who serve you.

Your Commerce manager is a man to know... a man you want to know you. You can trust him to keep your confidence. You can trust the men and women who work with him... they are trained to be discreet about your business.

Yes, our Canadian towns are friendly places... and the men and women at your Commerce branch are good people to know.

The Canadian Bank of Commerce

"The Commerce"
